

shared data-space architectural style:

Event-based architectures can be combined with data-centered architectures, yielding what is also known as shared data spaces. The essence of shared data spaces is that processes are now also decoupled in time: they need not both be active when communication takes place.

• Figure 2-2. (b) The shared data-space architectural style.

All these architectural styles aim at achieving **distribution transparency**.

SYSTEM ARCHITECTURES:

Deciding on software components, their interaction, and their placement leads to an instance of a software architecture, also called a system architecture.
