Automatic extraction and processing of document references Kathrin Eichler, 2010-10-13 Master s Thesis from the year 2007 in the subject Computer Science Applied grade 1 0 University of Sunderland School of Computing and Technology language English abstract While reading documents you often encounter text passages advising you to refer to other documents for more information about a specific topic These references to other documents are particularly common in technical documents written for the sole purpose of providing the reader with as much relevant information as possible without rephrasing information that can be found elsewhere Knowing how the documents in a system are interrelated i e which other documents a document refers to or is referred by can be extremely helpful when trying to get access to relevant information A typical example of such a knowledge net providing information about document relations is CiteSeer a digital library of academic literature For each document in the library system CiteSeer displays lists of related documents such as a list of documents that the current document cites as well as a list of documents that the current document is cited by The assumption that inspired this thesis is that such lists are not only helpful when reading academic literature but could also assist a reader of technical documents stored in a company s document management system The idea was thus to extend an existing document management system by displaying for each document stored in the system a list of links to documents that the current document refers to As information about how the documents in this system are interrelated was not available the focus of the project underlying this thesis was on the first step towards solving this task automatically analyzing documents in order to extract names of related documents Once all

document names mentioned in a document have been extracted the next step would then be to search for these documents in the system's database and in case they have been successfully found create links to the respective documents The outcome of the project was a system that performs the extraction task It is based on Conditional Random Fields a machine learning technique introduced by Lafferty et al 2001 and is able to extract document names from unseen documents achieving high precision scores 88% and acceptable recall scores 65% on a test dataset The implementation is based on a Java package provided by Sarawagi Cohen 2005 which was adapted and extended to suit the nature of the task As the approach is based on supervised learning the project also involved the generation of appropriate training data

Java Library Management System Project Documentation Introduction

In the digital age, access to information has become easier than ever before. The ability to download Java Library Management System Project Documentation has revolutionized the way we consume written content. Whether you are a student looking for course material, an avid reader searching for your next favorite book, or a professional seeking research papers, the option to download Java Library Management System Project Documentation has opened up a world of possibilities. Downloading Java Library Management System Project Documentation provides numerous advantages over physical copies of books and documents. Firstly, it is incredibly convenient. Gone are the days of carrying around heavy textbooks or bulky folders filled with papers. With the click of a button, you can gain immediate access to valuable resources on any device. This convenience allows for efficient studying, researching, and reading on the go. Moreover, the cost-effective nature of downloading Java Library Management System Project Documentation has democratized knowledge. Traditional books and academic journals can be expensive, making it difficult for individuals with limited financial resources to access information. By offering free PDF downloads, publishers and authors are enabling a wider audience to benefit from their work. This inclusivity promotes equal opportunities for learning and personal growth. There are numerous websites and platforms where individuals can download Java Library Management System Project Documentation. These websites range from academic databases offering research papers and journals to online libraries with an expansive collection of books from various genres. Many authors and publishers also upload their work to specific websites, granting readers access to their content without any charge. These platforms not only provide access to existing literature but also serve as an excellent platform for undiscovered authors to share their work with the world. However, it is essential to be cautious while downloading Java Library Management System Project Documentation. Some websites may offer pirated or illegally obtained copies of copyrighted material. Engaging in such activities not only violates copyright laws but also undermines the efforts of authors, publishers, and researchers. To ensure ethical downloading, it is advisable to utilize reputable websites that

prioritize the legal distribution of content. When downloading Java Library Management System Project Documentation, users should also consider the potential security risks associated with online platforms. Malicious actors may exploit vulnerabilities in unprotected websites to distribute malware or steal personal information. To protect themselves, individuals should ensure their devices have reliable antivirus software installed and validate the legitimacy of the websites they are downloading from. In conclusion, the ability to download Java Library Management System Project Documentation has transformed the way we access information. With the convenience, cost-effectiveness, and accessibility it offers, free PDF downloads have become a popular choice for students, researchers, and book lovers worldwide. However, it is crucial to engage in ethical downloading practices and prioritize personal security when utilizing online platforms. By doing so, individuals can make the most of the vast array of free PDF resources available and embark on a journey of continuous learning and intellectual growth.
