

Compiler Construction: Principles and Practice
by Kenneth C. Louden

Chapter 5 Exercise Answers

Ex. 5.1

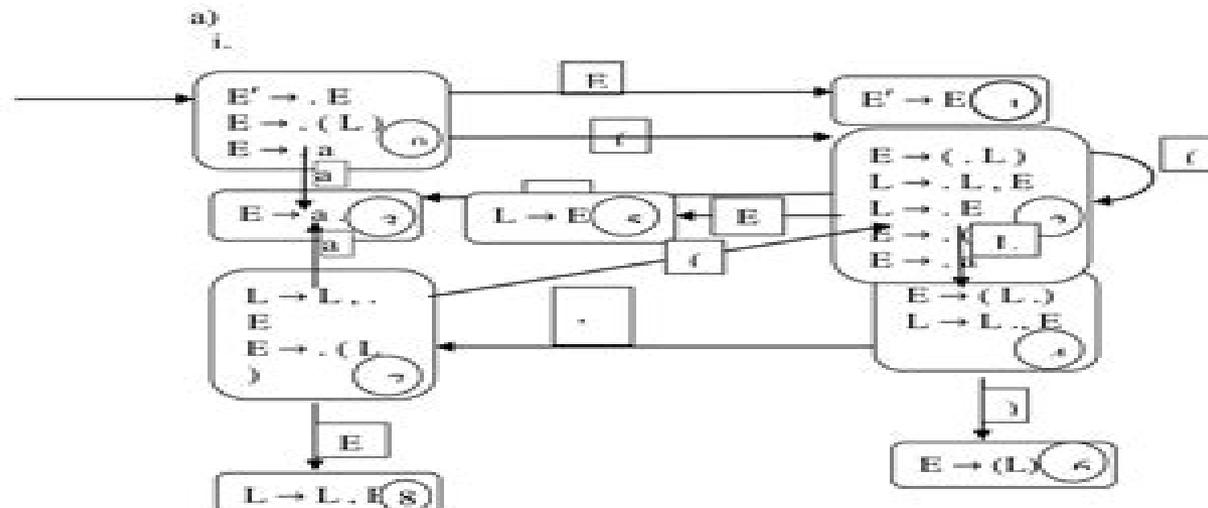

Consider the following grammar:

$$E \rightarrow (L) \mid a$$

$$L \rightarrow L, E \mid E$$

- I. Construct the DFA of LR(0) items for this grammar. (2)
- II. Construct the SLR(1) parsing table. (2)
- III. Is this grammar an LR(0) grammar? If not describe the LR(0) conflict. (2)
- IV. Show the parsing stack and the actions of an SLR(1) parser for the input string $((a), a), (a))$. (2)

Solution:

- ii. The following table uses the grammar rule numbering (1) $A \rightarrow A(A)$ and (2) $A \rightarrow \epsilon$, and is based on the fact that $Follow(A) = \{ (,), \$ \}$:

State	Input					Go to	
	()	,	a	\$	E	L
0	S2			S3		1	
1					$r(E' \rightarrow E)$

Compiler Construction Principles And Practice Kenneth C. Louden, 2003 *Compiler Construction* William M. Waite, Gerhard Goos, 2012-12-06 Compilers and operating systems constitute the basic interfaces between a programmer and the machine for which he is developing software In this book we are concerned with the construction of the former Our intent is to provide the reader with a firm theoretical basis for compiler construction and sound engineering principles for selecting alternate methods implementing them and integrating them into a reliable economically viable product The emphasis is upon a clean decomposition employing modules that can be re used for many compilers separation of concerns to facilitate team programming and flexibility to accommodate hardware and system constraints A reader should be able to understand the questions he must ask when designing a compiler for language X on machine Y what tradeoffs are possible and what performance might be obtained He should not feel that any part of the design rests on whim each decision must be based upon specific identifiable characteristics of the source and target languages or upon design goals of the compiler The vast majority of computer professionals will never write a compiler Nevertheless study of compiler technology provides important benefits for almost everyone in the field It focuses attention on the basic relationships between languages and machines Understanding of these relationships eases the inevitable transitions to new hardware and programming languages and improves a person's ability to make appropriate tradeoffs in design and implementation Compiler Construction D. M. Dhamdhere, 1983 **Compiler Construction** Kenneth C. Louden, 1997 This compiler design and construction text introduces students to the concepts and issues of compiler design and features a comprehensive hands on case study project for constructing an actual working compiler **Compiler Construction** Görel Hedin, 2003-03-14 This book constitutes the refereed proceedings of the 12th International Conference on Compiler Construction CC 2003 held in Warsaw Poland in April 2003 The 20 revised full regular papers and one tool demonstration paper presented together with two invited papers were carefully reviewed and selected from 83 submissions The papers are organized in topical sections on register allocation language constructs and their implementation type analysis Java port pourri and optimization

Managing IT in Construction/Managing Construction for Tomorrow Attila Dikbas, Esin Ergen, Heyecan Giritli, 2009-09-15 Managing IT in Construction Managing Construction for Tomorrow presents new developments in Managing IT strategies Model based management tools including building information modeling Information and knowledge management Communication and collaboration Data acquisition and storage Visualization and simulation Architectural design and Compiler Construction David A. Watt, 2003-06-29 ETAPS2000 was the third instance of the European Joint Conference on Theory and Practice of Software ETAPS is an annual federated conference that was established in 1998 by combining a number of existing and new conferences This year it comprised ve conferences FOSSACS FASE ESOP CC TACAS ve satellite workshops CBS CMCS CoFI GRATRA INT seven invited lectures a panel discussion and ten tutorials The

events that comprise ETAPS address various aspects of the system development process including specification design implementation analysis and improvement The languages methodologies and tools which support these activities are all well within its scope Different blends of theory and practice are represented with an inclination towards theory with a practical motivation on one hand and soundly based practice on the other Many of the issues involved in software design apply to systems in general including hardware systems and the emphasis on software is not intended to be exclusive

Compiler Construction, 2005 Software Architectures Manfred Nagl, Bernhard Westfechtel, 2024-04-26 This textbook concentrates on processes activities and results related to software architectures It describes the separation of architecture artefacts corresponding to their nature their logical or their modeling level on one hand and at the same time emphasizes their integration based on their mutual relations Design or development processes demand for integration as different artifacts must be elaborated which are mutually dependent and need to be in a consistent form The book is structured in four parts The introductory Part I deals with the relevance of architectures the central role of the design subprocess both in development or maintenance and the importance of the decisions and artefacts in the overall result Another topic is the spectrum of views an architecture language has to offer and that there are different architectures to be regarded from abstract and static to detailed technical and specific Part II then discusses important topics on the architecture level It deals with adaptability especially for embedded systems with integrating styles pattern notations with different reuse forms and how to find them with the role of architectures for integrating different existing systems and with reverse and reengineering of legacy systems Next Part III covers architecture modeling and its relation to surrounding activities as well as architectures to surrounding other results The single chapters are on transformation between requirements and architectures architectures and programming architectures and project management and organization as well as architectures and their relations to quality assurance or documentation Eventually Part IV summarizes the main messages and presents open problems both for every single chapter and across chapters Every chapter focuses on a specific problem it addresses a question it answers the attention it demands a message it conveys and further open questions it raises The chapters are mostly independent which implies a certain redundancy yet it allows lecturers and their students to either use the book as the basis of teaching software architecture or design or to just pick those aspects that need special attention in a more advanced course
