Complexity: A Very Short Introduction John H. Holland, 2014-07-24 The importance of complexity is well captured by Hawking's comment Complexity is the science of the 21st century From the movement of flocks of birds to the Internet environmental sustainability and market regulation the study and understanding of complex non linear systems has become highly influential over the last 30 years In this Very Short Introduction one of the leading figures in the field John Holland introduces the key elements and conceptual framework of complexity From complex physical systems such as fluid flow and the difficulties of predicting weather to complex adaptive systems such as the highly diverse and interdependent ecosystems of rainforests he combines simple well known examples Adam Smith's pin factory Darwin's comet orchid and Simon's watchmaker with an account of the approaches involving agents and urn models taken by complexity theory ABOUT THE SERIES The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area These pocket sized books are the perfect way to get ahead in a new subject quickly Our expert authors combine facts analysis perspective new ideas and enthusiasm to make interesting and challenging topics highly readable [Handbook on Strategic Environmental Assessment](#) Thomas B. Fischer, Ainhoa González, 2021-03-26 This comprehensive Handbook shows how Strategic Environmental Assessment SEA an important decision support tool for strategies policies plans and programmes is applied globally It reflects on SEA practices and the advancements made over the past three decades in the development of SEA [First Complex Systems Digital Campus World E-Conference 2015](#) Paul Bourguine, Pierre Collet, Pierre Parrend, 2016-12-24 This book contains the proceedings as well as invited papers for the first annual conference of the UNESCO Unitwin Complex System Digital Campus CSDC which is an international initiative gathering 120 Universities on four continents and structured in ten E Departments [First Complex Systems Digital Campus World E Conference 2015](#) features chapters from the latest research results on theoretical questions of complex systems and their experimental domains The content contained bridges the gap between the individual and the collective within complex systems science and new integrative sciences on topics such as genes to organisms to ecosystems atoms to materials to products and digital media to the Internet The conference breaks new ground through a dedicated video conferencing system a concept at the heart of the international UNESCO UniTwin embracing scientists from low income and distant countries This book promotes an integrated system of research education and training It also aims at contributing to global development by taking into account its social economic and cultural dimensions [First Complex Systems Digital Campus World E Conference 2015](#) will appeal to students and researchers working in the fields of complex systems statistical physics computational intelligence and biological physics **Pilot Competency and Capability** Steven Green, 2023-04-06 Pilot Competency and Capability presents strategies for the air carrier pilot in command operating complex engineered systems within a complex natural environment It bridges the gap between academic books and practical application by providing real world examples of how

various safety and operational theories work in practice The book advises on how to develop concepts strategies and ways of thinking that integrate with existing structures and FAA regulations while understanding how engineered systems and codified structures interface with complex natural environments It considers how the prescribed safety margins function to manage emergent behaviors of both the natural environment and the engineered systems The book is intended for airline pilots training captains simulator instructors and aviation students taking courses in aviation safety risk management and flight safety to improve in flight decision making risk analysis and strategic planning

Computation in Science Konrad Hinsen,2015-12-01 This book provides a theoretical background in computation to scientists who use computational methods It explains how computing is used in the natural sciences and provides a high level overview of those aspects of computer science and software engineering that are most relevant for computational science The focus is on concepts results and applications rather than on proofs and derivations The unique feature of this book is that it connects the dots between computational science the theory of computation and information and software engineering The book should help scientists to better understand how they use computers in their work and to better understand how computers work It is meant to compensate a bit for the general lack of any formal training in computer science and information theory Readers will learn something they can use throughout their careers

SDGs in the Americas and Caribbean Region Walter Leal Filho,Noé Aguilar-Rivera,Bruno Borsari,Paulo R. B. de Brito,Baltazar Andrade Guerra,2023-08-31 This volume provides an overview of the ways sustainable development issues as a whole and the SDGs in particular are perceived and practiced in a variety of countries in the Latin America and Caribbean region It also discusses the extent to which its many socio economic problems hinder progresses towards the pursuit of a sustainable future and documents successful experiences from across the region This book is part of the 100 papers to accelerate the implementation of the UN Sustainable Development Goals initiative

Chaos and Dynamical Systems David P. Feldman,2019-08-06 *Chaos and Dynamical Systems* presents an accessible clear introduction to dynamical systems and chaos theory important and exciting areas that have shaped many scientific fields While the rules governing dynamical systems are well specified and simple the behavior of many dynamical systems is remarkably complex Of particular note simple deterministic dynamical systems produce output that appears random and for which long term prediction is impossible Using little math beyond basic algebra David Feldman gives readers a grounded concrete and concise overview In initial chapters Feldman introduces iterated functions and differential equations He then surveys the key concepts and results to emerge from dynamical systems chaos and the butterfly effect deterministic randomness bifurcations universality phase space and strange attractors Throughout Feldman examines possible scientific implications of these phenomena for the study of complex systems highlighting the relationships between simplicity and complexity order and disorder Filling the gap between popular accounts of dynamical systems and chaos and textbooks aimed at physicists and mathematicians *Chaos and Dynamical Systems* will be highly useful not only to students at the

undergraduate and advanced levels but also to researchers in the natural social and biological sciences

Everyday Creativity and the Healthy Mind Ruth Richards,2018-08-20 As human beings we all have creative potential a quality essential to human development and a vital component to healthy and happy lives However this may often remain stifled by the choices we make or ways in which we choose to live in our daily lives Framed by the Four Ps of Creativity product person process press this book offers an alternative understanding of the fundamentals of ordinary creativity Ruth Richards highlights the importance of process circumventing our common preoccupation with the product or creative outcome of creativity By focusing instead on the creator and the creative process she demonstrates how we may enhance our relationships with life beauty future possibilities and one another This book illustrates how our daily life styles and choices as well as our environments may enable and allow creativity whereas environments not conducive to creative flow may kill creative potential Also explored are questions of normality beauty and nuance in creativity as well as creative relationships
