

# WHAT IS GENERATIVE AI?

VISUALLY EXPLAINED... BY GENERATIVE AI

ChatGPT, DALL-E, MidJourney, DeepMind—generative AI technologies have exploded into mainstream consciousness. With access to these technologies increasing day-by-day, we asked AI to help demonstrate the power and influence of this new tech trend.

This robot—and all the visuals in this infographic, including icons—were generated using AI software like MidJourney and DALL-E. The text captions were also generated using AI (ChatGPT).

This design was created and illustrated using the following text prompt: a robot head, metallic, no background, without a body, 3d render, digital, realistic, detailed, vibrant colors, AI

**Generative AI** is a type of artificial intelligence (AI) that uses machine learning algorithms to create new and original content like images, videos, text, and audio.

## 1 Forming a Database

A neural network, consisting of various information or media files like images, text, data, sounds, etc., forms the basis of artificial intelligence.

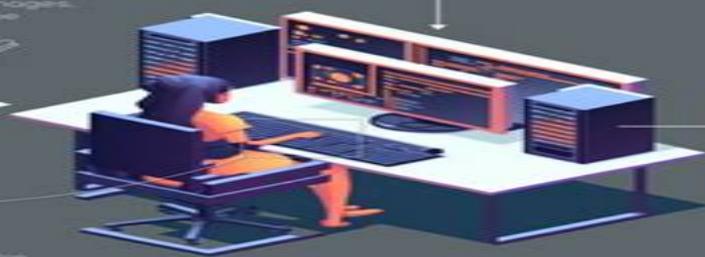

## 2 Inputting a Prompt

The user provides the AI with a description or sample of the desired content.

Prompts can be any user-submitted material, like words, numbers, or photos.

## 3 Generating Content

And the AI uses its neural network to generate new examples that are similar to the ones it has trained from.
