Modeling Mineral and Energy Markets

Walter C. Labys, 2012-12-06 This book provides a framework for analyzing and forecasting a variety of mineral and energy markets and related industries Such modeling activity has been at the forefront of the economic and engineering professions for some time having received a major stimulus following the first oil price shock in 1973 Since that time other shocks have affected these markets and industries causing disequilibrium economic adjustments which are difficult to analyze and to predict Moreover geopolitics remains an important factor which can destabilize crude oil markets and associated refining industries Mineral and energy modeling consequently has become a major interest of energy related corporations mining and drilling companies metal manufacturers public utilities investment banks national government agencies and international organizations This book hopes to advance mineral and energy modeling as follows 1 The modeling process is presented sequentially by leading the model builder from model specification estimation simulation and validation to practical model applications including explaining history analyzing policy and market and price forecasting 2 New developments in modeling approaches are presented which encompass econometric market and industry models spatial equilibrium and programming models optimal resource depletion models input output models economic sector models and macro oriented energy interaction models including computable general equilibrium 3 The verification and application of the models is considered not only individually but also in relation to the performance of alternative modeling approaches and 4 The modeling framework includes a perspective on new directions so that the present model building advice will extend into the future
