Elements Swing Fundamental Michael Jacobs:

Elements of the Swing Michael Jacobs, 2016-08-12 For as long as golfers and golf instructors have been in the game they've been searching for better ways to understand the swing. Until now they've always had to rely on the RESULT of a swing seeing positions or movement live or in pictures or video or data on TrackMan. Not anymore. In *Elements of the Swing* Michael Jacobs introduces the first swing analysis that looks at what CAUSES the club to move. Based on a seven-year research project with preeminent golf scientist Dr. Steven Nesbit, *Elements of the Swing* uses analysis from Jacobs and Nesbit's cutting-edge new software to show for the first time WHY a club moves the way it does, not just HOW. *Elements of the Swing* is the first book to explain the basic physics of the club's movement in a way that any player or teacher can both understand and immediately use. You'll learn about the factors that give each swing its unique fingerprint and how to change your swing in ways that lead to improved performance, not just improved positions, aesthetics, or numbers on a TrackMan screen. It will become one of the game's standard teaching texts.

Plant and Process Engineering 360 Mike Tooley, 2009-12-07 *Plant and Process Engineering 360* will be the backbone of any plant, chemical, or process engineer's library. This is a broad area in which engineers need to be familiar with a wide array of techniques, technologies, and equipment. Its focus on providing a broad introduction to key systems makes the book the first point of reference for engineers who are involved with designing, specifying, maintaining, or working with plant, process, and control technologies in many sectors, including manufacturing, chemical process, and energy. A single source of plant and process equipment information for engineers, providing a 360-degree view of the critical equipment engineers encounter, enables readers to get up to speed with unfamiliar topics quickly with an overview of important but disparate technologies that are specific to plant engineering. Covers the systems and processes that drive effective and efficient plants and processes. Drawn from authoritative Elsevier resources, this book is a first port of call with breadth and depth of content from leading figures in the field.

Music of the World War II Era William H. Young, Nancy K. Young, 2007-12-30 In the World War II era, big bands and swing music reached the heights of popularity with soldiers as well as friends and loved ones back home. Many entertainers, such as Glenn Miller, also served in the military or supported the war effort with bond drives and entertaining the troops at home and abroad. In addition to big band and swing music, musicals, jazz, blues, gospel, and country music were also popular. Chapters on each, along with an analysis of the evolution of record companies, records, radios, and television, are included here for students, historians, and fans of the era. Includes a timeline of the music of the era, an appendix of the Broadway and Hollywood Musicals 1939-1945, and an appendix of Songs, Composers, and Lyricists 1939-1945. An extensive discography and bibliography, along with approximately 35 black and white photos, complete the volume.

Art Long Beach (Calif.). Board of Education, 1931 **Video** Yvonne Spielmann, 2010-08-13 An argument that video is not merely an intermediate stage between analog and digital but a medium in its own right traces the theoretical genealogy of video and examines the different concepts of video seen in works by Vito Acconci Ulrike Rosenbach Steina and Woody Vasulka and others Video is an electronic medium dependent on the transfer of electronic signals Video signals are in constant movement circulating between camera and monitor This process of simultaneous production and reproduction makes video the most reflexive of media distinct from both photography and film in which the image or a sequence of images is central Because it is processual

and not bound to recording and the appearance of a frame video shares properties with the computer In this book Yvonne Spielmann argues that video is not merely an intermediate stage between analog and digital but a medium in its own right Video has metamorphosed from technology to medium with a set of aesthetic languages that are specific to it and current critical debates on new media still need to recognize this Spielmann considers video as transformation imagery acknowledging the centrality in video of the transitions between images and the fact that these transitions are explicitly reflected in new processes After situating video in a genealogical model that demonstrates both its continuities and discontinuities with other media Spielmann considers three strands of video praxis documentary experimental art and experimental image making which is concerned primarily with signal processing She then discusses selected works by such artists as Vito Acconci Ulrike Rosenbach Joan Jonas Nam June Paik Peter Campus Dara Birnbaum Nan Hoover Lynn Hershman Gary Hill Steina and Woody Vasulka Bill Seaman and others These works serve to demonstrate the spectrum of possibilities in video as medium and point to connections with other forms of media Finally Spielmann discusses the potential of interactivity complexity and hybridization in the future of video as a medium
