

Embryology

1. In terms of ectomesenchyme; define the terms(5)

Merging - When two processes approach each other and mesenchyme from each process flows into the other eg. Maxillary process merging with lateral nasal process

Fusion - When two processes approach each other; subsequent fusion of each epithelial layer to form a common epithelial tract; eg. Only left and right palatal shelves

2. Explain how the origin of the mucosal lining of the oral cavity differs from that of the pharynx and the rest of the GIT(2)

- Due to the rostro-caudal folding of the embryo, the mucosal lining of the mouth is of ectoderm origin
- Mucosal lining of the pharynx and GIT are subsequently of endoderm origin

3. Explain the difference between genetic and congenital abnormalities with examples of each.(5)

Genetic - Abnormalities within the genome of the fetus eg. Mutation of particular gene and subsequent expression - can be passed from generation to generation - sickle cell anaemia, dentinogenesis imperfecta

Congenital - Abnormalities that an individual is born with mainly due to the environment causes eg. Various teratogens

4. Describe the anatomical areas (lip and palate) where clefts can potentially occur during embryological development of the face and explain why they would occur in these areas. Also name the types of clefts.

Types of clefts of the lip

Complete

- Extending from the nostril to the mouth
- Unilateral
- Bilateral

Partial

- Extending for varying distances from the lip to the nostril (never from nostril)
- Unilateral
- Bilateral

Proceedings of the Association of American Medical Colleges ,1908 Soul of the Embryo David Albert Jones,2004-12-01 We are delighted to announce that this book has been short listed for the prestigious Michael Ramsey prize for the best in theological writing For more information please visit www.michaelramseyprize.org.uk A radical examination of the Christian tradition relating to the human embryo and how this relates to the debate today In recent years the moral status of the human embryo has come to the fore as a vital issue for a range of contemporary ethical debates concerning the over production freezing and discarding of embryos in IVF concerning the use of spare embryos for scientific experimentation and finally concerning the prospect of producing clone embryos These debates have involved not only general philosophical arguments but also specifically religious arguments Many participants have attempted to find precedent from the Christian tradition for the positions they wish to defend It is therefore extraordinary that until *The Soul of the Embryo* there has been no significant work on the history of Christian reflection on the human embryo Here David Albert Jones seeks to tell the story of this unfolding tradition a story that encompasses many different medical moral philosophical and theological themes He starts by examining the understanding of the embryo in the Hebrew Scriptures then moves through early Christianity and the Middle Ages to the Reformation and beyond Finally Albert Jones considers the application of this developed tradition to contemporary situation and questions which contemporary Christian view or views are best regarded as authentic developments of the tradition and which should be regarded as alien to the tradition A Treatise on comparative embryology v.1, 1880 Francis Maitland Balfour,1880 **Detroit Medical Journal** ,1905 Lange Q&A
