Flow Visualization Experiments with a Dolphin Moe William Rosen,1963 The manner in which water flows about the body of a swimming dolphin is a subject concerning which little is known In 1958 2 years before the research described in this report what appeared to be an immense transverse vortex was discovered by the author in the water spray over the back of a leaping dolphin In addition a peculiar system of large twin armed transverse vortexes appeared in the spray wake behind its tail Further original experiments that year with a fish led to the discovery by the author that a remarkable system of large discrete vortexes the Fish Vortex System exists in the water at the sides of a swimming fish The resemblance of the dolphin s spray vortex to the fish vortexes in design and position was striking These discoveries stimulated the further flow visualization research on dolphins reported here The findings of this research indicate the presence of a vortex phenomenon under water about the body of a dolphin that resembles the Fish Vortex System Author *British Qualifications* Barbara Priestley,1978 **Indian Engineering** ,1920 □□□□□□□□□□ Frank Joseph Shulman,Anna See Ping Leon Shulman,2001-01-01 A descriptively annotated multidisciplinary cross referenced and extensively indexed guide to 2 395 dissertations that are concerned either in whole or in part with Hong Kong and with Hong Kong Chinese students and emigres throughout the world **Catalogue** Washington and Lee University,1907 1857 58 includes Triennial register of Alumni **The United States Catalog** ,1921 **Engineering** ,1871 Parliamentary Papers Great Britain.
