Survey of Planar and Outerplanar Graphs in Fuzzy and Neutrosophic Graphs Takaaki Fujita, Florentin Smarandache, 2025-01-01 As many readers may know graph theory is a fundamental branch of mathematics that explores networks made up of nodes and edges focusing on their paths structures and properties 196 A planar graph is one that can be drawn on a plane without any edges intersecting ensuring planarity Outerplanar graphs a subset of planar graphs have all their vertices located on the boundary of the outer face in their planar embedding In recent years outerplanar graphs have been formally defined within the context of fuzzy graphs To capture uncertain parameters and concepts various graphs such as fuzzy neutrosophic Turiyam and plithogenic graphs have been studied In this paper we investigate planar graphs outerplanar graphs apex graphs and others within the frameworks of neutrosophic graphs Turiyam Neutrosophic graphs fuzzy graphs and plithogenic graphs

HyperGraph and SuperHyperGraph Theory with Applications Takaaki Fujita, Florentin Smarandache, 2025-12-01 Hypergraphs generalize this framework by allowing hyperedges that connect more than two vertices Superhypergraphs further enrich the model through iterated powerset constructions capturing hierarchical and self referential structures among hyperedges An SuperHyperGraph is a

mathematical structure in which each vertex corresponds to an superhyperfunction defined on a base set while the hyperedges group such functions together to represent higher order relationships and contextual connections Systematic research on SuperHyperGraphs is still relatively limited compared with the extensive literature on graphs and hypergraphs To help bridge this gap this book presents a survey of fundamental and advanced concepts related to SuperHyperGraphs Our aim is twofold i to increase the visibility and accessibility of SuperHyperGraph theory and thereby stimulate further research and ii to deepen the mathematical understanding of their structures among researchers and practitioners who work with graph and hypergraph based models
