Project Report FOOD ADULTERATION : INTRODUCTION

Food Adulteration : In our daily life there are so many unhygienic and contaminated things for our health. Most of our things are contaminated. Even the food, which we eat, is adulterated. Now a question arises that what is adulteration? The answer is that the *deliberate contamination of food material with low quality, cheap and non-edible or toxic substances is called food adulteration*. The substance, which lowers or degrades the quality of food material, is called an adulterant. Adulteration brings a lot of easy money for the traders, but it may spoil many lives. Food adulteration can lead to slow poisoning and various kinds of diseases, which can even result in death. Adulteration makes the food items used in our daily life unsafe and unhygienic for use. An easy example of food adulteration is vanaspati ghee in desi ghee.
