Artificial Intelligence in Real-time Control (AIRC-2000) I. J. Rudas,J. K. Tar,2001 This Proceedings contains the papers presented at the 9th IFAC AIRTC 2000 Symposium on Artificial Intelligence in Real Time Control 2000 held at Budapest Polytechnic Hungary on 2 4 October AIRTC 2000 builds on the excellent reputation of previous meetings in the series for providing top quality papers in this important research field A positive development illustrated by this Proceedings is a new trend towards pragmatism in the research field Examples of this trend are an increase in the number of actual industrial applications support for more widespread use of new sophisticated technologies e g materials design further

intertwining of artificial intelligence and control theory methods that reduces the reliance on blind faith still too often associated with AI methods Many things have changed since the first AIRTC event in 1988 Two examples illustrate the change in the general attitude of the IFAC family in 1990 one of the major closing presentations of the IFAC World Congress warned the control community about the coming hordes of AI people In 1999 one of the plenary papers at the IFAC World Congress pointed out that the AI based methods form a natural extension of control theory to the class of non linear systems with incomplete information at least as far as the optimisation is concerned This contrast in attitudes shows how during the past decade many AI people have embraced control theory and many control people have learned the basics of AI This Proceedings serves to continue this excellent dialogue by providing many quality papers which link both fields *Bulletin* University of Illinois (Urbana-Champaign campus). Artificial Intelligence Masoud Yazdani,Ajit Narayanan,1984 *Computing Japan* ,1999 *PLET, Programmed Learning & Educational Technology* ,1986 *AI Magazine* ,2003 *International Encyclopedia of Developmental and Instructional Psychology* Erik de Corte,Franz E. Weinert,1996 This Encyclopedia intends to provide a research based overview in an educational perspective of the present state of the art of our knowledge and understanding of the conditions processes and modifiabilities of human development and learning The Encyclopedia focuses on both developmental psychology and instructional psychology Over the past decade the boundaries between these two separate research domains have become increasingly obscure Indeed developmental psychologists have shown a growing interest in the impact of environmental factors on development this has led to the study of educational and instructional variables the pre dominantly environmental factors Meanwhile instructional psychology has become a major subdomain of research on human cognition and development A substantial contribution to the synergy between both domains derives from the robust research finding that developmental changes are very important conditions as well as consequences of the acquisition of knowledge and meta cognitive strategies The resulting changes have inspired the decision to combine both developmental and instructional psychology into one single volume The trend toward the integration of both domains notwithstanding the systematic discussion of their research findings requires a certain delimitation of the two fields The Encyclopedia is divided into 16 areas in order to reflect the specific nature as well as the integration of both domains In the first section which is most representative of the integrative tendency a general framework of research on human development learning and instruction is outlined The next six chapters are concerned with the various aspects of human development and learning The remaining nine sections represent an overview of the research findings on learning and instruction which are relevant to education Articles include updated and revised material from the International Encyclopedia of Education 2nd Edition described by

Choice as being a premier resource when judged on virtually every criteria applied to a reference work The Encyclopedia provides an informative introduction to aspects of developmental psychology and instructional psychology that significantly influence education
