1. Name at least 3 biotic and 3 abiotic factors in the ecosystem to the right.

a. Biotic

fish, bird, and the frog

b. Abiotic

Water, sand/soil, and the rock

2. Explain the relationship between individuals and populations.

A group of organisms of the same species living in the same area at a given time that interbreed and compete for resources such as food, mates, and shelter. Also, population size is the number of individuals in a given population. Population size increases with person immigration but decreases with death and emigration.

3. For each scenario, explain whether it would increase or decrease the population size and why.

Scenario	Increase or Decrease	Why?
Rabbits have a large amount of babies.	Increase	More individuals are being added to the population
Rabbits run out of food.	Decrease	Overtime the rabbits will die due to starvation, as organisms die individuals are being taken away from the population
There is a virus that only targets specific rabbits in the population.	Decrease	The virus will lead to a population decrease due to it inducing death among that select group of rabbits.
Rabbits have unlimited food.	Increase	Generally, in there's an unlimited source populations will grow exponentially
A large number of rabbits are moved to a small area of field.	Decrease	Individuals are moving out of an existing population into a new one.
