Contrastive Analysis vs. Error Analysis in Respect of their Treatment of the Avoidance Phenomenon Elena Gluth, 2020-04-06 Seminar paper from the year 2003 in the subject English Language and Literature Studies Linguistics grade 1 5 Free University of Berlin Institut für Englische Philologie language English abstract This research paper compares contrastive analysis with the error analysis approach in respect of their treatment of avoidance behaviour. It considers several researches on avoidance behaviour and shows that contrastive analysis predicts the avoidance phenomenon in most cases and therefore gives a complete description of the areas of difficulty for learners of a second language. There exist two different approaches for the identification of possible learning problems in the second language acquisition: contrastive analysis and error analysis. A number of proponents of an error analysis approach claim that contrastive analysis cannot serve as an adequate tool for identifying the areas of difficulty for learners of a second language. But on the other hand, it has been noticed that error analysis is not able to explain the avoidance phenomenon since error analysis registers only the errors done by learners of a second language. Avoidance behaviour represents a communicative strategy of a learner of a second language by which the learner prefers using a simpler form instead of the target linguistic element for the reason of difficulty on the part of the target feature. Consequently, avoidance behaviour serves as a manifestation of learning problems and its results should be definitely considered when compiling language syllabi and tests.

*Contrastive Analysis and Error Analysis in Respect of Their Treatment of the Avoidance Phenomenon* Elena Gluth, 2008-03 Seminar paper from the year 2003 in the subject English Language and Literature Studies Linguistics grade 1 5 Free University of Berlin 22 entries in the bibliography language English abstract Introduction There exist two different approaches for the identification of possible learning problems in the second language acquisition: contrastive analysis and error analysis. A number of proponents of an error analysis approach claim that contrastive analysis cannot serve as an adequate tool for identifying the areas of difficulty for learners of a second language. But on the other hand, it has been noticed that error analysis is not able to explain the avoidance phenomenon since error analysis registers only the errors done by learners of a second language. Schachter 1974 Avoidance behaviour represents a communicative strategy of a learner of a second language by which the learner prefers using a simpler form instead of the target linguistic element for the reason of difficulty on the part of the target feature. Consequently, avoidance behaviour serves as a manifestation of learning problems and its results should be definitely considered when compiling language syllabi and tests. Laufer and Eliasson 1993 And since error analysis does not consider and is not able to explain the avoidance phenomenon, it cannot be observed as an adequate approach for assisting teachers of a second language with learning materials. In this paper, we set a goal to compare contrastive analysis with the error analysis approach in respect of their treatment of avoidance behaviour. We will consider several researches on avoidance behaviour and will show that contrastive analysis does predict the avoidance phenomenon in most cases and therefore gives a complete

description of the areas of difficulty for learners of a second language We suppose that we can come across the cases in which the avoidance phenomenon would not manifest itself although it has been predicted by contr *Contrastive Analysis and Error Analysis* Pedro Obando,1982 **Studies in Contrastive Linguistics and Error Analysis** Dietrich Nehls,1979 **Second Language Learning** ,1983 *A Survey of Contrastive Analysis and Error Analysis* Wendee Olivia Smith Rogers,1980 *Questions and Answers on Contrastive Analysis & Error Analysis* Muḥammad Z̤iyā' Ḥusaynī,2006 *Errors in Language Learning and Use* Carl James,2013-12-02 Errors in Language Learning and Use is an up to date introduction and guide to the study of errors in language and is also a critical survey of previous work Error Analysis occupies a central position within Applied Linguistics and seeks to clarify questions such as Does correctness matter Is it more important to speak fluently and write imaginatively or to communicate one s message Carl James provides a scholarly and well illustrated theoretical and historical background to the field of Error Analysis The reader is led from definitions of error and related concepts to categorization of types of linguistic deviance discussion of error gravities the utility of teacher correction and towards writing learner profiles Throughout the text is guided by considerable practical experience in language education in a range of classroom contexts worldwide **Contrastive Analysis and Error Analysis** Mohammad Hossein Keshavarz,1993 **Contrastive Analysis Versus Error Analysis** Melina-Julia Tamvakaki,1982 **A Contrastive Analysis of Persian & English and Error Analysis** Muḥammad Z̤iyā' Ḥusaynī,2004 *Errata* Jan Svartvik,1973 Bidrag til Symposium on Error Analysis held in Lund 26 27 September 1972 **Contrastive Analysis and Error Analysis** RELC Library and Information Centre,1984 *Bilinguality and Bilingualism* Josiane F. Wetzorke,2010 Seminar paper from the year 2005 in the subject English Pedagogy Didactics Literature Studies grade 1 3  
Technical University of Braunschweig Englisches Seminar language English abstract Foreign Language Pedagogy FLP in  
general aims to convey to teachers the essential information about the role of the learner and the teacher in the process of  
language learning and also provides them with theoretical didactic methods and practical means for the foreign language  
classroom FLC We can even go a step further by claiming that the mission of FLP is to research for and establish the  
supreme way of a teaching a foreign language FL to the learners However within this field of research it becomes quite  
obvious that the learners take in a rather passive role and do not contribute very much to new research data and hence new  
approaches towards foreign language teaching FLT This thesis can be held true to give just one example when we consider  
the various teaching methods for the FLC Although the role of the learner is taken into account in each method the learners  
are fairly more than testing objects of teaching models hypothesized by didactic scientists On the other hand one must admit  
that in correspondence with the recent emergence and establishment of the communicative approach CA the learners  
preferences and demands have been taken far more into consideration and their linguistic and communicative performance  
serve as source for methodological research input and constructive teacher strategies oriented as well as learner strategies  
oriented output offered by science Recently and paradoxically enough it can be perceived intensive discussion concerning the  
question how to deal best with errors produced by learners More precisely there has been a shift from the formerly applied  
Contrastive Analysis CAH toward the occupation with Error Analysis EA      *Resources in Education* ,1976
