The large number of pedagogical devices employed in this text will guide a student through the course. Integrated throughout the text, students and instructors will find Explore/Discuss boxes which encourage students to think critically about mathematical concepts. In each section, the worked examples are followed by matched problems that reinforce the concept being taught. Students find his writing style inviting and clear; faculty find it exceptionally accurate and up to date. He provides a complete set of interactive audio-visual lectures called lectlets to engage students who find that hearing enhances their comprehension. Hurlburt deftly employs repetition and a progressive cumulative integration of concepts so students build upon what they learn as they progress through the course. Hurlburt's unique eyeball estimation techniques, which garnered high praise in previous editions, helps students gain experience in making educated guesses. New to this edition, *COMPREHENDING BEHAVIORAL STATISTICS THIRD EDITION* includes a FREE Personal Trainer CD. This hands-on CD contains 43 interactive audio-visual lectures called lectlets covering all the concepts in the text. Students use the lectlets to prepare for class, to clarify concepts they didn't understand in class, to substitute for a missed class, and to review for exams. The FREE Personal Trainer also includes *ESTAT*, Hurlburt's unique eyeball estimation software which enables students to make an educated guess about the magnitude of a statistic without the use of a calculator or statistical tables. *ESTAT* includes *datagen*, the easiest to use statistical/computational software.
