

ARTHUR KOESTLER

The background of the cover is a dark, stormy sky with a bright, jagged lightning bolt striking down towards a globe. The globe is positioned in the center-left of the frame. In the foreground, there is a glowing, circular object that resembles a lens or a mirror, with a bright light reflecting off its surface. The overall mood is mysterious and technological.

The last half of the twentieth century has seen the emergence of literary theory as a new discipline As with any body of scholarship various schools of thought exist and sometimes conflict within it I R Makaryk has compiled a welcome guide to the field Accessible and jargon free the Encyclopedia of Contemporary Literary Theory provides lucid concise explanations of myriad approaches to literature that have arisen over the past forty years Some 170 scholars from around the world have contributed their expertise to this volume Their work is organized into three parts In Part I forty evaluative essays examine the historical and cultural context out of which new schools of and approaches to literature arose The essays also discuss the uses and limitations of the various schools and the key issues they address Part II focuses on individual theorists It provides a more detailed picture of the network of scholars not always easily pigeonholed into the categories of Part I This second section analyses the individual achievements as well as the influence of specific scholars and places them in a larger critical context Part III deals with the vocabulary of literary theory It identifies significant complex terms places them in context and explains their origins and use Accessibility is a key feature of the work By avoiding jargon providing mini bibliographies and cross referencing throughout Makaryk has provided an indispensable tool for literary theorists and historians and for all scholars and students of contemporary criticism and culture **Conflict: Human Needs Theory** John Burton,1990-09-25

Kubrick's Story, Spielberg's Film Julian Rice,2017-06-16 In 1963 Stanley Kubrick declared Dr Strangelove came from my desire to do something about the nuclear nightmare Thirty years later he was preparing to film another story about the human impulse for self destruction Unfortunately the director passed away in 1999 before his project could be fully realized However fellow visionary Steven Spielberg took on the venture and A I Artificial Intelligence debuted in theaters two years after Kubrick s death While Kubrick s concept shares similarities with the finished film there are significant differences between his screenplay and Spielberg s production In Kubrick s Story Spielberg s Film A I Artificial Intelligence Julian Rice examines the intellectual sources and cinematic processes that expressed the extraordinary ideas of one great artist through the distinctive vision of another A I is decidedly a Kubrick film in its concern for the future of the world and it is both a

Kubrick and a Spielberg film in the alienation of its central character However Spielberg s alienated characters evolve through friendships while Kubrick s protagonists are markedly alone Rice explores how the directors disparate sensibilities aligned and where they diverged By analyzing Kubrick s treatment and Spielberg s finished film Rice compares the imaginations of two gifted but very different filmmakers and draws conclusions about their unique conceptions Kubrick s Story Spielberg s Film is a fascinating look into the creative process of two of cinema s most profound auteurs and will appeal to scholars of film as well as to fans of both directors

Threads of Life Richard Freadman,2001-02 Many autobiographers share profound questions about human life with their readers questions like To what extent was my life imposed on me To what extent did I bring it about through particular choices and actions through the activity of my own will Indeed the issue of the will is central to autobiographical writing and some of the greatest autobiographies give extended consideration to the will its nature its powers its limitations the forms of freedom constraint and expression it finds in various cultures its role in particular human lives In this new study unprecedented in subject and scope Richard Freadman offers the first sustained account of how changing theological philosophical and psychological accounts of the human will have been reflected in the writing of autobiography and of how autobiography in its turn has helped shape various understandings of the will Early chapters trace narrative representations of the will from antiquity the Greeks and Augustine to postmodernism Derrida and Barthes with particular emphasis on late modernity s culture of the will Later chapters then present detailed and powerfully original readings of autobiographical texts by Louis Althusser Roland Barthes B F Skinner Ernest Hemingway Simone de Beauvoir Arthur Koestler Stephen Spender and Diana Trilling Freadman s interdisciplinary approach to autobiography and the will includes a theoretical defense of the view that autobiographers are in varying degrees agents in their own texts *Threads of Life* argues that late modernity has inherited deeply conflicted attitudes to the will Freadman suggests that these attitudes now deeply embedded in contemporary cultural discourse need reexamining In this he contends reflective autobiography has an important part to play

The Age of Stress Mark Jackson,2013-03-28 We are living in a stressful world yet despite our familiarity with the notion stress remains an elusive concept In *The Age of Stress* Mark Jackson explores the history of scientific studies of stress in the modern world In particular he reveals how the science that legitimates and fuels current anxieties about stress has been shaped by a wide range of socio political and cultural as well as biological factors stress he argues is both a condition and a metaphor In order to understand the ubiquity and impact of stress in our own times or to explain how stress has commandeered such a central place in the modern imagination Jackson suggests that we need to comprehend not only the evolution of the medical science and technology that has gradually uncovered the biological pathways between stress and disease in recent decades but also the shifting social economic and cultural contexts that have invested that scientific knowledge with meaning and authority In particular he argues we need to acknowledge the manner in which enduring concerns about the effects of stress on mental and physical health are the

product of broader historical preoccupations with the preservation of personal and political as well as physiological stability
