When objects start moving, it is useful to be able to describe an object's location.

To describe location, imagine a meterstick is placed next to the object. The meterstick acts like a number line.

Examples:

- A. What is the position of the lightning bolt? 5 meters
- B. What is the position of the happy face? 1 meter
- C. What is the position of the sun? -4 meters

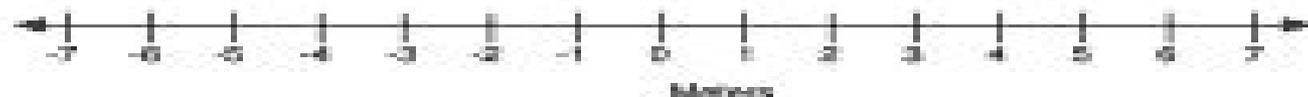

Use the number line below to give the positions of the objects (Don't forget units!):

1. What is the position of the heart? _____
2. What is the position of the diamond? _____
3. What is the position of the cross? _____

B. Locating Positions:

Draw the object at the indicated locations:
