countries The book's initial chapters introduce and summarize recent discussions and developments in the conceptualization, implementation, and evaluation of international large-scale context assessments and provide an outlook on possible future developments. Subsequently, three thematic sections—Student Background, Outcomes of Education Beyond Achievement, and Learning in Schools—each present a series of chapters that provide the conceptual background for a wide range of important topics in education research, policy, and practice. Each chapter defines a conceptual framework that relates recent findings in the educational effectiveness research literature to current issues in education policy and practice. These frameworks were used to develop interesting and relevant indicators that may be used for meaningful reporting from international assessments, other cross-cultural research, or national studies. Using the example of one particular survey, the Programme for International Student Assessment (PISA) 2015, this volume links all theoretical considerations to fully developed questionnaire material that was field-trialed and evaluated in questionnaires for students and their parents, as well as teachers and principals in their schools. The primary purposes of this book are to inform readers about how education effectiveness research and international large-scale assessments are already interacting to inform research and policymaking; to identify areas where a closer collaboration of both fields or input from other areas could further improve this work; to provide sound theoretical frameworks for future work in both fields; and finally, to relate these theoretical debates to currently available and evaluated material for future context assessments.

Life Span Development Robert S. Feldman, 2010-08-22 For Human Development Lifespan Development courses organized topically Life Span Development A Topical Approach is based on the chronologically organized highly popular Development Across the Life Span is approximately 20% shorter than traditional lifespan books and organized topically Life Span Development A Topical Approach maintains the student friendliness that has been the hallmark of Feldman's other development textbooks It

is rich in examples and illustrates the applications that can be derived from the research and theory of lifespan developmentalists. It pays particular attention to the applications that can be drawn from theory and research in the field. To optimize student learning and to provide instructors with maximum flexibility, the book uses a modular approach. Consequently, rather than facing long, potentially daunting chapters, students encounter material that is divided into smaller, more manageable chunks (modules). Presenting material in small chunks represents a structure that research long ago found to be optimum for promoting learning. This book is available with MyDevelopmentLab, which includes a full eText, videos, self-tests, flashcards, and MyVirtualChild, the interactive simulation which allows you to raise a virtual child from birth to age 18 and monitor the effects of your parenting decisions. MyDevelopmentLab does not come automatically with the text, so please be sure you check to ensure that an access code is included before placing your order. The book by itself has a different ISBN number than the book MyDevelopmentLab. You can also purchase a MyDevelopmentLab access code online at www.mydevelopmentlab.com.
