

STAGE

3

THE LOUVRE

3
STAGE

+ Chapter Focus

Let's learn how to control the flow of a game. You'll see how to keep score using variables and control the order of the game using breakpoints.

The Game

The game is actually two games in one. First, you'll have Roto's quest. Then you'll have to put the Mona Lisa back together in a puzzle game. If you get the answer wrong three times, the game ends and you lose!

This program has some lovely custom graphics. So let's start out by opening a blank file called **03 - Louvre Puzzle.sln** (it's uploaded from your computer), which has three options in it. Take a look around. You can see that the Stage has a background that shows the Louvre. We just don't have any programs yet!

Then we'll add a program that makes the Stage play music. The **XXXXXX** block is a special kind of command we call a loop. Any sound effect or music you add here keeps playing again and again, so make sure you like how it sounds!
