[Changing Life](#) Peter J. Taylor, Saul E. Halfon, Paul N. Edwards, 1997 In laboratories all over the world life even the idea of life is changing And with these changes whether they result in square tomatoes or cyborgs come transformations in our social order sometimes welcome sometimes troubling Changing Life offers a close look at how the mutable forms and concepts of life link the processes of science to those of information finance and commodities These essays about planetary management and genome sequencing ecologies and cyborgs address actual and imagined transformations at the center and at the margins of transnational relations during the post Cold War era and in times to come
