

**Brain Web Quest – Use the Internet
to Answer the following about:
Neuropsychology**

The brain is an incredible bundle of roughly 1 trillion neurons that all work together to enable you to function. Individually or with a study group, you will explore the brain in all its complexity through the internet.

Explain *in your words* the **function, location, and associated processes** of each of the following parts of the brain. In addition, label all parts on the diagrams provided. The purpose of this exercise is to train the brain in interactive and 3D diagrams, so make sure you look at many different websites, answering them all from one may prove frustrating and less meaningful.
