**Why They Can't Write** John Warner,2020-03-17 An important challenge to what currently masquerades as conventional wisdom regarding the teaching of writing There seems to be widespread agreement that when it comes to the writing skills of college students we are in the midst of a crisis In Why They Can't Write John Warner who taught writing at the college level for two decades argues that the problem isn't caused by a lack of rigor or smartphones or some generational character defect Instead he asserts we're teaching writing wrong Warner blames this on decades of educational reform rooted in standardization assessments and accountability We have done no more Warner argues than conditioned students to perform writing related simulations which pass temporary muster but do little to help students develop their writing abilities This style of teaching has made students passive and disengaged Worse yet it hasn't prepared them for writing in the college classroom Rather than making choices and thinking critically as writers must undergraduates simply follow the rules such as the five paragraph essay designed to help them pass these high stakes assessments In Why They Can't Write Warner has crafted both a diagnosis for what ails us

Khost, 2007 The disciplines of English and composition seem particularly prone to crisis driven proclamations our kids don t read the great works or they don t read at all or they can t write Crisis talk notwithstanding educators are left to theorize and practice ways to teach reading and writing with intelligence compassion and integrity However it often seems that theoretical formulations do not sufficiently explain their practicable applications and practicable discussions too rarely rise above the level of swapping recipes sharing assignments that work well in one context but may not in another Therefore the editors of this volume submit this collection of essays that strives to harmonize the all too often discordant qualities of theory and practice Each co authored essay illustrates and analyzes various classroom based strategies for productive collaboration between literature and composition This collection envisions a reciprocal to composing literature literaturing composition which entails living through literature as Louise Rosenblatt has it This process regards the literary text as a medium for

creative action so that one reads not to criticize so much as to imagine new compositional possibilities The eight essays in this collection are divided into four sections which span topics that include textuality and critical pedagogy argumentation and hybrid genres student engagement and popular culture and materiality and assessment Publisher s website
