expected to grow at a CAGR of 6.4%. The growing demand for epoxy resin in the paints and coatings industry is driving the market. In addition, demand is likely to be driven by the growing use of epoxy in the electronics and electrical industries as an insulator and to protect components from dust, short circuiting, and moisture. The rising demand for convenience and processed food and beverages is increasing the demand for packaging in both developed and emerging countries. Resins are used in internal coatings of cans to enhance the shelf life of canned food and beverage products. They are also used to protect and preserve the taste, texture, and colour of food and beverage products while preventing corrosion. Moreover, the increasing use of glass packaging is significantly contributing to the market growth as it uses resin to prevent corrosion in jars and bottles. The introduction of various stringent policies regarding food safety by several governments is increasing the use of epoxy resin, further fuelling the market growth. The book covers a variety of topics related to starting a Resin Business. It also includes images of the equipment and facility structure as well as information on machinery suppliers. An in-depth look at the Resin Industry and how to start a business in it. This book is a one-stop shop for everything you need to know about the Resin Industry, which is rife with opportunities for manufacturers, merchants, and entrepreneurs. This is the only book on the market that covers the entire process of establishing a commercial Surface Coating facility. The Complete Book on Adhesives, Glues & Resins Technology (with Process & Formulations) 2nd Revised Edition NPCS Board of Consultants & Engineers, 2017-02-24. An adhesive is a material used for holding two surfaces together. In the service condition, that way adhesives can be called as Social as they unite individual parts, creating a whole. A useful way to classify adhesives is by the way they react chemically after they have been applied to the surfaces to be joined. There is a huge range of adhesives, and one appropriate for the materials being joined must be chosen. Gums and resins are polymeric compounds and manufactured by synthetic routes. Gums and resins are largely used in water or other solvent-soluble form for providing special properties to some formulations. More than 95% of total adhesive used worldwide are based on synthetic resins. Gums and resins have wide industrial applications. They are used in the manufacture of lacquers, printing inks, varnishes, paints, textiles, cosmetics, food, and other industries. Increase in disposable income levels, rising GDP, and booming retail markets are propelling growth in packaging and flexible packaging industry. Growth of disposable products is expected to increase, which leads to an increase in consumption of adhesives in the packaging industry. The global value of the adhesive resins market is estimated to be 11,339.66 million and is projected to grow at a CAGR of about 4.88% in coming years. Rapid urbanization coupled with growing infrastructure and real estate construction projects is projected to further fuel demand for adhesives in India. This handbook covers photographs of plant machinery with suppliers' contact details and manufacturing aspects of various adhesives: glues, resins. The major contents of the book are: glues of animal origin, fish glues, animal glues, casein glues, adhesives, blood albumen glues, amino resin adhesives, cyanoacrylate adhesives, epoxy resin adhesives, phenolic resin adhesives, polychloroprene resin adhesives, polysulfide sealants, adhesives.
