Kellert,2012-09-26 Sustainable design has made great strides in recent years unfortunately it still falls short of fully

integrating nature into our built environment Through a groundbreaking new paradigm of restorative environmental design award winning author Stephen R Kellert proposes a new architectural model of sustainability In *Building For Life* Kellert examines the fundamental interconnectedness of people and nature and how the loss of this connection results in a diminished quality of life This thoughtful new work illustrates how architects and designers can use simple methods to address our innate needs for contact with nature Through the use of natural lighting ventilation and materials as well as more unexpected methodologies the use of metaphor perspective enticement and symbol architects can greatly enhance our daily lives These design techniques foster intellectual development relaxation and physical and emotional well being In the works of architects like Frank Lloyd Wright Eero Saarinen Cesar Pelli Norman Foster and Michael Hopkins Kellert sees the success of these strategies and presents models for moving forward Ultimately Kellert views our fractured relationship with nature as a design problem rather than an unavoidable aspect of modern life and he proposes many practical and creative solutions for cultivating a more rewarding experience of nature in our built environment [Towards Users' Optimal and Pleasurable Experience in Smart Environments](#) Mi Jeong Kim,Xiangyu Wang,Inhan Kim,2020-12-23 This eBook is a collection of articles from a Frontiers Research Topic Frontiers Research Topics are very popular trademarks of the Frontiers Journals Series they are collections of at least ten articles all centered on a particular subject With their unique mix of varied contributions from Original Research to Review Articles Frontiers Research Topics unify the most influential researchers the latest key findings and historical advances in a hot research area Find out more on how to host your own Frontiers Research Topic or contribute to one as an author by contacting the Frontiers Editorial Office frontiersin.org about contact

Aesthetics and Architectural Composition Ralf Weber, Matthias Albrecht Amann, 2005 *Imaginary Cities* Darran Anderson, 2024-05-31 For as long as humans have gathered in cities those cities have had their shining or shadowy counterparts Imaginary cities potential cities future cities perfect cities It is as if the city itself its inescapable gritty reality and elbow to elbow nature demands we call into being some alternative yearned for better place This book is about those cities It's neither a history of grand plans nor a literary exploration of the utopian impulse but rather something different hybrid idiosyncratic It's a magpie's book full of characters and incidents and ideas drawn from cities real and imagined around the globe and throughout history Thomas More's allegorical island shares space with Soviet mega planning Marco Polo links up with James Joyce's meticulously imagined Dublin the medieval land of Cockaigne meets the hopeful future of Star Trek With Darran Anderson as our guide we find common themes and recurring dreams tied to the seemingly ineluctable problems of our actual cities of poverty and exclusion and waste and destruction And that's where *Imaginary Cities* becomes more than a mere if ecstatically entertaining intellectual exercise for as Anderson says If a city can be imagined into being it can be re-imagined Every architect philosopher artist writer planner or citizen who dreams up an imaginary city offers lessons for our real ones harnessing those flights of hopeful fancy can help us improve the streets where we live Though it shares DNA with books as disparate as Calvino's *Invisible Cities* and Jane Jacobs's *Death and Life of Great American Cities* there's no other book quite like *Imaginary Cities* After reading it you'll walk the streets of your city real or imagined with fresh eyes
