A Heuristic Approach to Possibilistic Clustering: Algorithms and Applications Dmitri A. Viattchenin, 2013-04-17 The present book outlines a new approach to possibilistic clustering in which the sought clustering structure of the set of objects is based directly on the formal definition of fuzzy cluster and the possibilistic memberships are determined directly from the values of the pairwise similarity of objects The proposed approach can be used for solving different classification problems Here some techniques that might be useful at this purpose are outlined including a methodology for constructing a set of labeled objects for a semi supervised clustering algorithm a methodology for reducing analyzed attribute space dimensionality and a methods for asymmetric data processing Moreover a technique for constructing a subset of the most appropriate alternatives for a set of weak fuzzy preference relations which are defined on a universe of alternatives is described in detail and a method for rapidly prototyping the Mamdani s fuzzy inference systems is introduced This book addresses engineers scientists professors students and post graduate students who are interested in and work with fuzzy clustering and its applications
