Adverbs And Modality In English:

Adverbs and Modality in English Leo Hoyer, 2014-06-03 This new study on modality in English represents a departure from more traditional approaches to the subject where the modal auxiliaries have been the usual focus of attention by examining in detail the nature of their association with different categories of modal adverb. Modality is notoriously complex but the present work offers an accessible introduction to the topic, a comprehensive account of modal adverb co-occurrence and a reappraisal of the English modal system. The descriptive framework draws fresh insights from syntactic, semantic and pragmatic approaches to the study of language and communication and from recent work in corpus linguistics. The book includes contrastive reference to the expression of modality in Spanish and a discussion of modality in such applied contexts as language teaching. A major feature is its reliance on authentic spoken and written language data. The study is suitable for undergraduate and postgraduate students of linguistics, English language communications studies and related disciplines.

The Semantic Field of Modal Certainty A. M. Simon-Vandenberghe, Karin Aijmer, 2007 This book provides a detailed account of the syntactic, semantic and pragmatic properties of modal adverbs of certainty in present-day English. Methodologically it relies on three types of data: monolingual corpora, translation corpora and informant testing. It is the first study in which the semantic field of certainty as realised by English adverbs is explored. *Modal Expressions in English* Michael R. An international team of experts in the field examine the full range of methodological and theoretical approaches to the many facets of the phenomena involved. Following an opening section that provides an introduction and historical background to the topic, the volume is divided into five parts. Parts 1 and 2 present the basic linguistic facts about the systems of modality and mood in the languages of the world, covering the semantics and the expression of different subtypes of modality and mood respectively. The authors also examine the interaction of modality and mood mutually and with other semantic categories such as aspect, time, negation and evidentiality. In Part 3, authors discuss the features of the modality and mood systems in five typologically different language groups, while chapters in Part 4 deal with wider perspectives on modality and mood: diachrony, areality, first language acquisition and sign language. Finally, Part 5 looks at how modality and mood are handled in different theoretical approaches: formal syntax, functional linguistics, cognitive linguistics and construction grammar, and
