just being one possible goal While we all understand that scale practice is necessary what exactly it is you should be accomplishing by practicing them is not always clear In this volume using the range of the modern saxophonist the advancing student will find many new ways to effectively develop their scale practice into a means to develop several fundamental areas at once and connect this practice meaningfully to other fundamentals etudes and repertoire Working with patterns is hardly a new concept when it comes to the area of woodwind performance For generations there have been patterns and scale forms created to work with jazz improvisation and harmonic progressions develop characteristic technique for certain time periods of music and also quite plainly to provide some variety for students However many of these are not written down or transmitted effectively via demonstration or suggestion Thus if there isn't a tangible bit of material let alone a course for the student to work from they become easy to ignore and the student returns to the original scale form they had already learned Features Scale rotations with rhythmic and articulation variations using the full range scales introduced in Volume I A 30 day 30 way scale rotation that takes your existing scale work and makes a scheduled cycle of 30 unique variants to each scale 42 Diatonic Wholetone and Diminished Scale Patterns 15 Chromatic Tetrachord and Hexachord Patterns
