Economic and Political Consequences of AI: Managing Creative Destruction Günar, Altuğ,2025-01-14 Firms that innovate on the production function by using unorthodox paths in technology are disrupting routine actions and radically changing people's lives by

innovating in a disruptive way while reinventing new ways Schumpeterian innovations change the routine and traditional business conditions by realizing a new economic equilibrium and innovation in the production function Today the use of artificial intelligence AI and AI related applications and the expansion of their areas of use cause a Schumpeterian process of creative destruction causing a destructive but at the same time creative cycle such as the use of AI within existing technologies the increase in the opportunities provided by the applications and the replacement of old and new technology Therefore today the widespread use of AI is one of the most significant technological advancements of recent times encompassing a wide range of fields and significantly changing how economies and societies operate Economic and Political Consequences of AI Managing Creative Destruction investigates the impact of AI on economics and politics Although emerging AI and technologies scare societies and existing firms and companies it is essential to research the existing uncertainty to eliminate uncertainties and reveal or discuss potential benefits and harms Covering topics such as creative destruction cyber politics and the future of employment this book is an excellent resource for computer developers technology companies businesses professionals researchers policy makers scholars academicians and more **Creativity 360 Degrees** Mirela Holy,Jelena Budak,Rino Medić,2025-03-04 Creativity 360 Degrees offers a comprehensive examination of the creative industries sector in Southeast Europe spanning countries such as Albania Bosnia and Herzegovina Bulgaria Croatia Greece Kosovo Montenegro North Macedonia Romania Serbia and Slovenia **Knowledge-based Systems for General Reference Work** John V. Richardson,1995 By focusing on knowledge based systems technology the primary purpose and goal of this book is to improve the quality of reference service rendered in libraries Within reference service this book examines question answering a complex and difficult task For those interested in the theoretical aspects of reference work they have to look no further than the first chapter In addition the book features theoretical chapters on modelling the reference transaction a chapter on the logic of ready reference work and a chapter on the appropriate criteria to apply in selecting an expert system shell Several practical chapters focus on what KBS work has already been done in the field and evaluate nearly fifty expert system development shells so that readers can select the most appropriate shell for their domain The subtitle of the book is applications problems and progress in regard to expert systems in reference work Applications are covered most clearly in chapter 8 which reviews the more than extant prototypes Chapter 3 covers what is feasible chapter 4 models the reference transaction and chapter 7 covers interface issues so that future applications can be more successful Problems are covered throughout the book starting with chapter 1 which discusses the traditional emphasis on reference sources It argues that the field needs to shift toward procedural knowledge related to work in reference departments The chapter on expert system feasibility reveals that there are alternative ways of conceptualizing the intellectual work of an expert and of course chapter 9 directly points out limitations in extant systems Encouraging words occur in chapter 1 about the shift to a balanced or complete paradigm for doing reference work Similarly the chapter on modelling is optimistic in that

reference work can be modelled and systems implemented which act like human experts The final chapter tries to avoid the technological optimism inherent in many books on expert systems by identifying the near term factors which will influence the development of expert systems Key Features Historical background presenting the field s paradigmatic thinking Decision trees for basic formats of reference material Flowchart modelling the reference transaction Reviews of more than fifty extant KBS in general reference environments Evaluative criteria on more than forty expert system shells
